## BEFORE CALLING

Before requesting service for this unit, check the chart below for a possible cause of the problem you are experiencing. Some simple checks or a minor adjustment on your part may eliminate the problem and restore proper operation.  
If you are in doubt about some of the check points, or if the remedies indicated in the chart do not solve the problem, refer to the directory of Authorized Service Centers (enclosed with this unit) to locate a convenient service center, or consult your dealer for instructions.  
(In U.S.A. consult PASC Authorized Servicecenters for detailed instructions or call 1-800-545-2672 for the address of an authorized factory servicecenter.)

Problem	Checkpoint
No operations	Have the batteries been installed with their polarities (+, -) reversed?
No sounds. • A gritty noise is heard.	• Is the headphones plug firmly connected to the  jack? • Is the plug dirty?

## TAPE

### Auto stop

When the tape reaches the end during play, the automatic stop system will release **PLAY** and turn off the unit.

## BASS

### XBS

Boosts the low frequency range.

- If sound distortion occurs, turn down the volume.

## BATTERIES

- Insert the batteries in the correct polarities to avoid leakage and damage to this unit.
- Do not mix old and new batteries, or batteries of different types (mercuric, alkaline, etc.).
- Remove all the batteries if the set will not be used for a long period of time.
- Do not use rechargeable type batteries.

## CAUTION

- Avoid using or placing this unit near sources of heat. Do not leave it in an automobile exposed to direct sunlight for a long period of time with doors and windows closed.

### Listening caution

Do not play your headphones or earphones at a high volume. Hearing experts advise against continuous extended play. If you experience a ringing in your ears, reduce volume or discontinue use. Do not use while operating a motorized vehicle. It may create a traffic hazard and is illegal in many areas. You should use extreme caution or temporarily discontinue use in potentially hazardous situations. Even if your headphones or earphones is an open-air type designed to let you hear outside sounds, don't turn up the volume so high that you can't hear what's around you.

## MAINTENANCE

Get into a habit of cleaning the head assembly (after every 10 hours or so) with a cotton swab dampened with a little alcohol.

### Product Service

Do not attempt to remove the cover(s) or repair the unit yourself. Refer servicing to qualified personnel only.

#### ■ Product Information

For product service, product information or assistance with product operation, refer to the servicenter directory.

### Notes:

- Do not open the cassette compartment cover during tape operation.
- Between functions (during play, fast forward or rewind), always press **STOP** first to avoid jamming the tape.
- When the tape reaches the end after fast forward or rewind, press **STOP** to release the button.

### When the batteries are weak

The tape sound will become distorted, and the volume will decrease.

- To avoid product damage, do not expose this product to rain, water or other liquids.

Sound can be deceiving. Over time your hearing "comfort level" adapts to higher volumes of sound. So what sounds "normal" can actually be loud and harmful to your hearing. Guard against this by setting your equipment at a safe level **BEFORE** your hearing adapts. To establish a safe level:

- Start your volume control at a low setting.
- Slowly increase the sound until you can hear it comfortably and clearly, and without distortion.

Once you have established a comfortable sound level:

- Set the dial and leave it there.
